Luisa E. Delgado, Víctor H. Marin (Eds.)

Social-ecological Systems of Latin America: Complexities and Challenges

- The only book on social-ecological systems from Latin America
- Discusses social-ecological systems, which are the basis of Latin America's development
- Presents a discussion on the complexities of social-ecological systems from specialists in several areas (sociology, ecology, economy)

Human societies are influencing nature in such a way that their independent analysis is no longer suitable. Fortunately, social-ecological systems provide a conceptual framework for the interconnected analysis of societies and ecosystems. However, in the case of Latin America, the complexity of social-ecological processes undermined a much-needed compilation of theoretical concepts, methods and case studies. Increasing readers' understanding of such systems using a postnormal approach, the book discusses current concepts and methods with examples of studies from eight countries. It is a useful resource for social actors, government decision makers and scholars.
